

# PRESCRIPTIVE INFORMATION

**Use:** For the collection of urine.

**Caution:**

- Federal (U.S.A.) law restricts this device to sale by or on the order of a physician.
- This product contains natural rubber latex which may cause allergic reactions.

**Warning:**

After use, this product may be a potential biohazard. Handle and dispose of in accordance with accepted medical practice and applicable local, state and federal laws and regulations.

**Note:**

This is a single use device. Do not resterilize any portion of this device. Reuse and/or repackaging may create a risk of patient or user infection, compromise the structural integrity and/or essential material and design characteristics of the device, which may lead to device failure, and/or lead to injury, illness or death of the patient.

Contains or presence of phthalates. Di(2-ethylhexyl)phthalate (DEHP) is a plasticizer used in some polyvinyl chloride medical devices. DEHP has been shown to produce a range of adverse effects in experimental animals, notably liver toxicity and testicular atrophy. Although the toxic and carcinogenic effects of DEHP have been well established in experimental animals, the ability of this compound to produce adverse effects in humans is controversial. There is no evidence that neonates, infants, pregnant and breast feeding women exposed to DEHP experience any related adverse effects. However, a lack of evidence of causation between DEHP-PVC and any disease or adverse effect does not mean that there are no risks.

For the latest information, always check the "Instructions for Use" that comes packaged with the product.
